

## PORTABLE COMPRESSORS

More than 25 years ago, Sullair Corporation revolutionized the U.S. air compressor industry by introducing the first line of rotary screw compressors. With only two major moving parts, a male and female rotor, screw compressors are exceptionally simple, reliable machines. Today, they are the predominant type of portable compressor in use. Sullair's new line of portables, ranging from 125 to 1900 cfm, is designed for compactness, maneuverability and accesibility for route maintenance.

## HANDHELD PNEUMATIC TOOLS

Sullair's line of contractor tools include paving, rock drills, chipping hammers and other pneumatic tools for construction and mining. All are ruggedly built for long lasting operation under difficult conditions.

Sullair also offers a complete line of accessory steel for breakers, chipping, hammers and rivet busters.

### Chipping Hammers & Rock Drills

| Model                   | Weight (lbs) | Bore & Stroke (in) | Blows (Minute) | Warranty |
