

# Cat<sup>®</sup> General Duty Rubber Track

For Compact Track Loaders

## The Right Balance of Value and Life Expectancy

The General Duty Rubber Track is another option to help optimize value when the full value of Cat<sup>®</sup> Premium Rubber Track is not needed. General Duty Rubber Track is built to help lower owning and operating costs on machines with lower hour accumulation.

**BUILT FOR IT.**

## Match Rubber Track to business needs

General Duty Rubber Tracks are validated by Caterpillar engineers to meet the established product performance goals of your Cat machine. Machine utilization is what determines which Cat Rubber Track best matches your work and your budget.

## Lower owning and operating costs

Your Cat dealer has the expertise to help you choose the best Cat Rubber Track option.

- Your dealer has excellent General Duty parts availability for fast turnaround time.
- General Duty Rubber Track is an option to help optimize value when the full value of Cat Premium Rubber Track is not needed.

## Warranty

12 months/1,000 hours

The warranty does not cover:

- Application-related failures
- Damage or re-installation after derailment, unless the derailment was caused by a defect in workmanship or material

## Proper track tension delivers maximum wear life.

No matter what type of application you're working in, it's important to inspect tracks and keep tension in optimum ranges. We recommend that you clean and inspect your undercarriage at the end of every shift to be able to spot issues before they result in unwanted downtime.

**Check regularly, adjust when needed.**

**Avoid loose tracks to prevent:**

- Damage to lugs
- Side wear and debris ingestion – which can lead to chunking and eventual tear-off
- Possible derailments

**Avoid tight tracks to prevent:**

- Increased wear to tracks, roller wheels, sprockets, and drive motors
- Vulnerability to snapping

## CAT DEALERS DEFINE WORLD-CLASS PRODUCT SUPPORT.

We offer you the right parts and service solutions, when and where you need them.

Our network of highly trained experts keeps your entire fleet up and running to maximize your equipment investment.
